Terminal Disclaimer

1. The terminal disclaimer filed on 09 September 2005 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of 8 January 2021 has been reviewed and is accepted. The terminal disclaimer has been recorded.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The instant application discloses a receiver architecture comprising a latching mechanism coupled to receive a data stream. A search of prior art records fails to disclose a receiver comprising:

"a signal generator coupled to receive a reference signal, said signal generator generating said plurality of latching control signals responsive to said reference signal, where the plurality of latching control signals are offset; and an adjustable delay element coupled to receive a clock signal and delaying said clock signal according to a phase difference between said clock signal and said data stream to derive said reference signal, said reference signal so derived causing said signal generator to generate said latching control signals such that each of said latching control signals coincides approximately with a midpoint of a data period "as disclosed in claims 1 and 16.

"a signal generator coupled to receive a reference signal which is not aligned with said data stream, said signal generator generating said latching control signals based upon said reference signal such that each of said latching control signals coincides approximately with a

midpoint of a data period, where the latching control signals are offset by substantially one data period as disclosed in claim 28.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lawrence B Williams whose telephone number is 571-272-3037. The examiner can normally be reached on Monday-Friday (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kenneth Vanderpuye can be reached on 571-272-3078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
